The GMFM is a standardized observational instrument designed and validated to measure change in gross motor function over time in children with cerebral palsy. The scoring key is meant to be a general guideline. However, most of the items have specific descriptors for each score. It is imperative that the guidelines contained in the manual be used for scoring each item.

SCORING KEY

- 0 = does not initiate
- 1 = initiates
- 2 = partially completes
- 3 = completes
- 9 (or leave blank) = not tested (NT) [used for the GMAE-2 scoring*]

It is important to differentiate a true score of "0" (child does not initiate) from an item which is Not Tested (NT) if you are interested in using the GMFM-66 Ability Estimator (GMAE) Software.

*The GMAE-2 software is available for downloading from www.canchild.ca for those who have purchased the GMFM manual. The GMFM-66 is only valid for use with children who have cerebral palsy.

MINIMUM REQUIRED SCORING
3 consecutive "3s" as basal; 3 consecutive "0s" as ceiling
(except for potential floor and ceiling effects for children in levels V and I)
Scoring of all items between basal and ceiling
Minimum of 15 items total

USE THE SUGGESTED STARTING POINTS FOR AGE AND GMFCS AS A GUIDE ONLY

²GMFCS level is a rating of severity of motor function. Definitions for the GMFCS-E&R (expanded & revised) are found in Palisano, R., Rosenbaum, P., Bartlett, D., Livingston, M. (2008).
