GMFCS Family Report Questionnaire:
Children Aged 2 to <4 Years

Please read the following and mark only one box beside the description that best represents your child’s movement abilities.

My child...

☐ Has difficulty controlling head and trunk posture in most positions
  and uses specially adapted seating to sit comfortably
  and has to be lifted by another person to move about

☐ Can sit on own when placed on the floor and can move within a room
  and uses hands for support to maintain sitting balance
  and usually uses adaptive equipment for sitting and standing
  and moves by rolling, creeping on stomach or crawling

☐ Can sit on own and walk short distances with a walking aid (such as a walker, rollator, crutches, canes, etc.)
  and may need help from an adult for steering and turning when walking with an aid
  and usually sits on floor in a “W-sitting” position and may need help from an adult to get into sitting
  and may pull to stand and cruise short distances
  and prefers to move by creeping and crawling

☐ Can sit on own and usually moves by walking with a walking aid
  and may have difficulty with sitting balance when using both hands to play
  and can get in and out of sitting positions on own
  and can pull to stand and cruise holding onto furniture
  and can crawl, but prefers to move by walking

☐ Can sit on own and moves by walking without a walking aid
  and is able to balance in sitting when using both hands to play
  and can move in and out of sitting and standing positions without help from an adult
  and prefers to move by walking

GMFCS Family Report Questionnaire:  
Children Aged 4 to <6 Years

Please read the following and mark only one box beside the description that best represents your child’s movement abilities.

My child...

☐ Has difficulty sitting on their own and controlling their head and body posture in most positions
   and has difficulty achieving any voluntary control of movement
   and needs a specially-adapted supportive chair to sit comfortably
   and has to be lifted or hoisted by another person to move

☐ Can sit on their own but does not stand or walk without significant support and adult supervision
   and may need extra body / trunk support to improve arm and hand function
   and usually needs adult assistance to get in and out of a chair
   and may achieve self-mobility using a powered wheelchair or is transported in the community

☐ Can walk on their own using a walking aid (such as a walker, rollator, crutches, canes, etc.)
   and can usually get in and out of a chair without adult assistance
   and may use a wheelchair when travelling long distances or outside
   and finds it difficult to climb stairs or walk on an uneven surface without considerable help

☐ Can walk on their own without using a walking aid, but has difficulty walking long distances or on uneven surfaces
   and can sit in a normal adult chair and use both hands freely
   and can move from the floor to standing without adult assistance
   and needs to hold the handrail when going up or down stairs
   and is not yet able to run and jump

☐ Can walk on their own without using a walking aid, including fairly long distances, outdoors and on uneven surfaces
   and can move from the floor or a chair to standing without using their hands for support
   and can go up and down stairs without needing to hold the handrail
   and is beginning to run and jump

My child...

☐ Has difficulty sitting on their own and controlling their head and body posture in most positions
   and has difficulty achieving any voluntary control of movement
   and needs a specially supportive chair to sit comfortably
   and has to be lifted or hoisted by another person to move

☐ Can sit on their own but does not stand or walk without significant support
   and therefore relies mostly on wheelchair at home, school and in the community
   and often needs extra body / trunk support to improve arm and hand function
   and may achieve self-mobility using a powered wheelchair

☐ Can stand on their own and only walks using a walking aid (such as a walker, rollator, crutches, canes, etc.)
   and finds it difficult to climb stairs, or walk on uneven surfaces
   and may use a wheelchair when travelling for long distances or in crowds

☐ Can walk on their own without using walking aids, but needs to hold the handrail when going up or down stairs
   and often finds it difficult to walk on uneven surfaces, slopes or in crowds

☐ Can walk on their own without using walking aids, and can go up or down stairs without needing to hold the handrail
   and walks wherever they want to go (including uneven surfaces, slopes or in crowds)
   and can run and jump although their speed, balance, and coordination may be slightly limited
GMFCS-E&R Family Report Questionnaire: for Young People Aged 12 - 18 Years

Please read the following and mark only one box beside the description that best represents your child’s movement abilities.

My child...

☐ Has difficulty sitting on their own and controlling their head and body posture in most positions
   and has difficulty achieving any voluntary control of movement
   and needs a specially adapted chair to sit comfortably and be transported anywhere
   and has to be lifted or hoisted by another person or special equipment to move

☐ Can sit with some pelvic and trunk support but does not stand or walk without significant support
   and therefore always relies on wheelchair when outdoors
   and can achieve self-mobility using a powered wheelchair
   and can crawl or roll to a limited extent to move around indoors

☐ Can stand on their own and only walks using a walking aid (such as a walker, rollator, crutches, canes, etc.)
   and finds it difficult to climb stairs, or walk on uneven surfaces without support
   and uses a variety of means to move around depending on the circumstances
   and prefers to use a wheelchair to travel quickly or over longer distances

☐ Can walk on their own without using walking aids, but needs to hold the handrail when going up or down stairs
   and therefore walks in most settings
   and often finds it difficult to walk on uneven surfaces, slopes or in crowds
   and may occasionally prefer to use a walking aid (such as a cane or crutch) or a wheelchair to travel quickly or over longer distances

☐ Can walk on their own without using walking aids, and can go up or down stairs without needing to hold the handrail
   and walks wherever they want to go (including uneven surfaces, slopes or in crowds)
   and can run and jump although their speed, balance, and coordination may be limited
