

Your COVID story is a treasure!

Share it with our team of researchers, parents and youth at McMaster University to help improve services and supports for children/youth with disabilities and their families.

WHO

Children and youth across Canada ages 8 to 21 with any type of disability, and their parent/caregiver are invited to take part in this research study.

WHY

We want to hear about your experiences during COVID and your ideas about what services and support families need moving forward.

WHAT

We will work with each child/youth and their parents to figure out the format that works for you! The parent/caregiver will participate in a 1-hour virtual interview. The child/youth can complete a visual Covid Time Capsule (either online or in hard copy) and then participate in a 30-60 minute virtual interview to tell us about it. Each participant (child/youth) and (parent/caregiver) will receive a small honorarium.
